1	as a demonstrative, but I do object to it as a 1006 exhibit.	1	the studies show in the prospective comparison between the TV
2	THE COURT: I will admit it as an exhibit.	2	and the TVT-O?
3	(Defendants' Exhibit 23503 received in evidence.)	3	A. That they're equal.
4	BY MS. JONES:	4	Q. And, Doctor, based upon that information, do you have an
5	Q. Doctor, in addition to the randomized controlled studies	5	opinion as to whether or not the studies evaluating the TVT
6	and the long-term studies that we've just talked about, have	6	are applicable or have value for the TVT-O?
7	there been other studies that have been done with respect to	7	A. Yes. I think because it's the same material and we've
8	the TVT and the TVT-O?	8	shown similar efficacy that we can draw conclusions about the
9	A. Oh, yes. There have been lots of observational studies,	9	TVT-O by looking at the TVT studies.
10	monitoring patients for, you know, complications, looking at	10	Q. Let me ask you one other question: We've had some
11	the safety, that's always a big concern for physicians and	11	discussion about laser-cut mesh. Do the studies that we've
12	surgeons.	12	talked about with respect to the laser-cut mesh in your
13	Q. And, Doctor, have there been professional organizations	13	judgment, your opinion strike that. Start over.
14	that have actually looked at and evaluated the studies that	14	Do the studies that we've talked about with respect to
15	have been done with respect to midurethral slings?	15	the TVT-O apply equally to the TVT-O with the laser-cut mesh?
16	A. Yes.	16	A. Yes. There's really been shown no difference between the
17	Q. Let me back up. Have there actually been studies that	17	two ways that the mesh is cut, it doesn't really make a
18	have been done to compare the Retropubic and the obturator	18	difference.
19	midurethral slings?	19	Q. Do you know of any reason from a medical standpoint that
20	A. Yes. The TOMUS study we looked at earlier was one	20	the mere fact that it's laser-cut that it would pose that
21	example.	21	there would be any different efficacy rates?
22	Q. And have there been studies that have specifically looked	22	A. No.
23	at the TVT versus the TVT-O?	23	Q. Do you know of any reason from the standpoint that it's a
24	A. Yes.	24	laser-cut mesh that it would have different complication
25	Q. And what have those studies shown about how they are	25	rates?
	Page 119		Page 121
1	Page 119 alike or different?	1	Page 121 A. No.

Q. And, Doctor, is that complication a result of how the procedure differs in terms of the approach or implantation? MS. FITZPATRICK: Objection, Your Honor. THE COURT: Sustained. It is leading. BY MS. JONES: Q. Can you tell us, Doctor, what you attribute that difference to?	2 3 4 5 6 7 8 9 10 11 12 13	 A. No. Q. All right, Doctor. I want to turn to one other area real quick with respect to the literature. As to the literature and the studies that have been done, have there been doctor organizations that have looked at the information on midurethral slings and evaluated their safety and efficacy? A. Yes. Q. And let me hand you, Doctor, what's previously been marked as defense exhibit 20218 and ask you if you're familian with that. A. Yes, I am. Q. And tell us what that is. A. This is the position statement on mesh midurethral slings
2 3 4 5 6 7 8 9 10 11 12 13	alike or different? A. They're very comparable. The TVT-O does have increased risk of leg pain, groin pain, but it's almost always transient, it goes away within two days to a few weeks, so that's really the only difference that we see in the TVT versus the TVT-O. Q. And, Doctor, is that complication a result of how the procedure differs in terms of the approach or implantation? MS. FITZPATRICK: Objection, Your Honor. THE COURT: Sustained. It is leading. BY MS. JONES: Q. Can you tell us, Doctor, what you attribute that difference to? A. Sure. As I talked about before, the TVT-O goes through	2 3 4 5 6 7 8 9 10 11 12 13	 A. No. Q. All right, Doctor. I want to turn to one other area real quick with respect to the literature. As to the literature and the studies that have been done, have there been doctor organizations that have looked at the information on midurethral slings and evaluated their safety and efficacy? A. Yes. Q. And let me hand you, Doctor, what's previously been marked as defense exhibit 20218 and ask you if you're familiat with that. A. Yes, I am. Q. And tell us what that is. A. This is the position statement on mesh midurethral slings for stress incontinence put out by AUGS, the American Urogynecologic Society, and SUFU, which is the Society for
2 3 4 5 6 7 8 9 10 11 12 13 14	alike or different? A. They're very comparable. The TVT-O does have increased risk of leg pain, groin pain, but it's almost always transient, it goes away within two days to a few weeks, so that's really the only difference that we see in the TVT versus the TVT-O. Q. And, Doctor, is that complication a result of how the procedure differs in terms of the approach or implantation? MS. FITZPATRICK: Objection, Your Honor. THE COURT: Sustained. It is leading. BY MS. JONES: Q. Can you tell us, Doctor, what you attribute that difference to? A. Sure. As I talked about before, the TVT-O goes through those leg muscles, so those muscles can feel cramped, sore,	2 3 4 5 6 7 8 9 10 11 12 13 14	A. No. Q. All right, Doctor. I want to turn to one other area real quick with respect to the literature. As to the literature and the studies that have been done, have there been doctor organizations that have looked at the information on midurethral slings and evaluated their safety and efficacy? A. Yes. Q. And let me hand you, Doctor, what's previously been marked as defense exhibit 20218 and ask you if you're familian with that. A. Yes, I am. Q. And tell us what that is. A. This is the position statement on mesh midurethral slings for stress incontinence put out by AUGS, the American Urogynecologic Society, and SUFU, which is the Society for Urodynamics and Female Urology. So both those organization got together and said what's our position on this, is this
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	alike or different? A. They're very comparable. The TVT-O does have increased risk of leg pain, groin pain, but it's almost always transient, it goes away within two days to a few weeks, so that's really the only difference that we see in the TVT versus the TVT-O. Q. And, Doctor, is that complication a result of how the procedure differs in terms of the approach or implantation? MS. FITZPATRICK: Objection, Your Honor. THE COURT: Sustained. It is leading. BY MS. JONES: Q. Can you tell us, Doctor, what you attribute that difference to? A. Sure. As I talked about before, the TVT-O goes through those leg muscles, so those muscles can feel cramped, sore, inflamed right after the surgery. Q. And in contrast to that, what does the Retropubic or the TVT-O?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	 A. No. Q. All right, Doctor. I want to turn to one other area real quick with respect to the literature. As to the literature and the studies that have been done, have there been doctor organizations that have looked at the information on midurethral slings and evaluated their safety and efficacy? A. Yes. Q. And let me hand you, Doctor, what's previously been marked as defense exhibit 20218 and ask you if you're familiat with that. A. Yes, I am. Q. And tell us what that is. A. This is the position statement on mesh midurethral slings for stress incontinence put out by AUGS, the American Urogynecologic Society, and SUFU, which is the Society for Urodynamics and Female Urology. So both those organization got together and said what's our position on this, is this procedure to be recommended or not? And the conclusion was
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	alike or different? A. They're very comparable. The TVT-O does have increased risk of leg pain, groin pain, but it's almost always transient, it goes away within two days to a few weeks, so that's really the only difference that we see in the TVT versus the TVT-O. Q. And, Doctor, is that complication a result of how the procedure differs in terms of the approach or implantation? MS. FITZPATRICK: Objection, Your Honor. THE COURT: Sustained. It is leading. BY MS. JONES: Q. Can you tell us, Doctor, what you attribute that difference to? A. Sure. As I talked about before, the TVT-O goes through those leg muscles, so those muscles can feel cramped, sore, inflamed right after the surgery. Q. And in contrast to that, what does the Retropubic or the TVT-O? A. And the Retropubic goes straight up and exits right	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	 A. No. Q. All right, Doctor. I want to turn to one other area real quick with respect to the literature. As to the literature and the studies that have been done, have there been doctor organizations that have looked at the information on midurethral slings and evaluated their safety and efficacy? A. Yes. Q. And let me hand you, Doctor, what's previously been marked as defense exhibit 20218 and ask you if you're familiat with that. A. Yes, I am. Q. And tell us what that is. A. This is the position statement on mesh midurethral slings for stress incontinence put out by AUGS, the American Urogynecologic Society, and SUFU, which is the Society for Urodynamics and Female Urology. So both those organization got together and said what's our position on this, is this procedure to be recommended or not? And the conclusion wat that it is safe and effective and has improved the quality of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	alike or different? A. They're very comparable. The TVT-O does have increased risk of leg pain, groin pain, but it's almost always transient, it goes away within two days to a few weeks, so that's really the only difference that we see in the TVT versus the TVT-O. Q. And, Doctor, is that complication a result of how the procedure differs in terms of the approach or implantation? MS. FITZPATRICK: Objection, Your Honor. THE COURT: Sustained. It is leading. BY MS. JONES: Q. Can you tell us, Doctor, what you attribute that difference to? A. Sure. As I talked about before, the TVT-O goes through those leg muscles, so those muscles can feel cramped, sore, inflamed right after the surgery. Q. And in contrast to that, what does the Retropubic or the TVT-O? A. And the Retropubic goes straight up and exits right behind the pubic bone.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. No. Q. All right, Doctor. I want to turn to one other area real quick with respect to the literature. As to the literature and the studies that have been done, have there been doctor organizations that have looked at the information on midurethral slings and evaluated their safety and efficacy? A. Yes. Q. And let me hand you, Doctor, what's previously been marked as defense exhibit 20218 and ask you if you're familian with that. A. Yes, I am. Q. And tell us what that is. A. This is the position statement on mesh midurethral slings for stress incontinence put out by AUGS, the American Urogynecologic Society, and SUFU, which is the Society for Urodynamics and Female Urology. So both those organization got together and said what's our position on this, is this procedure to be recommended or not? And the conclusion wat that it is safe and effective and has improved the quality of life for millions of women.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	alike or different? A. They're very comparable. The TVT-O does have increased risk of leg pain, groin pain, but it's almost always transient, it goes away within two days to a few weeks, so that's really the only difference that we see in the TVT versus the TVT-O. Q. And, Doctor, is that complication a result of how the procedure differs in terms of the approach or implantation? MS. FITZPATRICK: Objection, Your Honor. THE COURT: Sustained. It is leading. As to the literature and the studies that have been done, have there been doctor organizations that have looked at the information on midurethral slings and evaluated their safety and efficacy? A. Yes. Q. And let me hand you, Doctor, what's previously been marked as defense exhibit 20218 and ask you if you're familiat with that. A. Yes, I am. Q. And tell us what that is. A. This is the position statement on mesh midurethral slings for stress incontinence put out by AUGS, the American Urogynecologic Society, and SUFU, which is the Society for Urodynamics and Female Urology. So both those organization got together and said what's our position on this, is this procedure to be recommended or not? And the conclusion wathat it is safe and effective and has improved the quality of life for millions of women. MS. JONES: Can we pull that up, please? BY MS. JONES:

Page 122 Page 124 1 recognized worldwide standard of care for the treatment of 2 stress urinary incontinence. The procedure is safe, 2 Q. And what is their recommendation under 1.10.3? 3 effective, and has improved the quality of life for millions 3 A. The surgeon should use procedures and devices for which 4 there is current high quality evidence of efficacy and safety. 5 Q. Do you agree with that? 5 Only use a device that they have been trained to use. Use type one mesh and consider using a tape colored for high 6 A. Absolutely. 6 7 Q. And if we turn to the -- first of all, in the 7 visibility. 8 introduction, what do the authors say is the purpose of this 8 Q. Let me ask these questions. One, if you look down to 9 9 footnote 11, does it identify the devices for which they 1.0 10 determined there was current high quality evidence? A. They say that the purpose is to support the use of the 11 midurethral sling in the surgical management of stress 11 A. Yes. 12 12 incontinence. Q. And what are those devices? 13 A. TVT or Advantage, TVT-O, Monarch and Obtryx. Q. If we turn to the conclusion of the paper, page three, 13 14 what was the conclusion of these two organizations? 14 Q. And then my next question is if we go up to the big part, 15 A. The conclusion was that it has helped millions of women 15 it says use a device manufactured from type one macroporous 16 with stress incontinence regain control of their lives by 16 polypropylene tape. Does the TVT-O have that type of mesh 17 undergoing a simple outpatient procedure that allows them to 17 A. Yes. 18 return to daily life very quickly. With its acknowledged 18 Q. And where it says consider using a tape colored for high 19 safety and efficacy it has created an environment for a much 19 visibility, do you have any coloring on the TVT-O mesh? 20 larger number of women to have access to treatment. 2.0 A. Yes. It's blue. 21 21 THE COURT: Do any of the other products have a Q. And, Doctor, let me just ask you, do you agree with the 22 conclusions of the AUGS statement here? 22 color? 23 A. Yes. 23 THE WITNESS: Yes, most of them have color now, but 24 Q. In your judgment, based upon your training and experience 24 there are still a couple that are clear. 25 25 and use of the TVT-O, do these conclusions apply to the TVT-O? THE COURT: All right. Page 125 Page 123 1 A. Yes. 1 BY MS. JONES: 2 Q. In your judgment, based upon your experience, do these 2 Q. Doctor, I want to turn to a little bit of a different conclusions apply to the TVT-O with the laser-cut mesh? 3 3 subject matter. I want to talk with you about Ms. Huskey. I 4 think you told us you had an opportunity to examine her? 4 5 Q. Now, are you also familiar, Doctor, with an organization 5 A. Yes, I did. 6 known as NICE or NICE? 6 THE COURT: Why don't we break here? It seems we A. Yes. 7 7 just switched topics and it's two minutes till. 8 Q. I'm handing you what's previously been received as 8 Ladies and gentlemen, we'll take our lunch break. defense exhibit 20212. And, Doctor, can you tell us what that 9 9 I'll ask you to be back at ten minutes after 1:00. Have a 10 document is? 10 nice lunch. 11 A. Yes. This is put out by the National Institute for Don't talk about the case among yourselves or permit 11 12 Health and Care Excellence, and it's a guideline, a clinical 12 anyone to discuss it with you or in your presence. Don't read 13 guideline for the management of urinary incontinence in women 13 anything, watch anything, listen to anything, use any social 14 THE COURT: Ms. Jones. 14 media or do any research. Have a nice lunch. Counsel, do you have anything for me? 15 MS. FITZPATRICK: I need a copy. 15 16 MS. JONES: I'm sorry. I thought I had handed it. 16 MR. THOMAS: Yes, Your Honor. Just briefly. 17 17 BY MS. JONES: THE COURT: All right. You're excused, ladies and 18 Q. If you look at page 24 of that document, Doctor, was the 18 gentlemen. 19 group looking at and examining synthetic tapes? 19 (The Jury left the courtroom at 11:58 a.m.) 20 20 THE COURT: Could I have a representative of the 21 Q. And in terms of the synthetic tapes, what type of tapes 21 plaintiffs' team? 22 was it referring to here? 22 MR. WALLACE: Sorry, Judge. 23 A. They specifically refer to the type one macroporous 23 MR. THOMAS: Your Honor, I'd like to offer the polypropylene tape of which TVT and TVT-O are types of that. 24 24 as-read deposition transcript of Dr. Elizabeth Mueller and the Q. And specifically were they looking at midurethral slings? 25 25 as-played transcript of Dr. Aaron Kirkemo.
